

This course is designed for internal auditors involved in IT audits or those involved in audit activities that require an understanding of how to manage the impact of cybersecurity events on business risks. The objective is to provide auditors the ability to examine preventive, detective and corrective controls and how to apply the audit process to a cloud environment. Attendees will be exposed to the mobile environment and cyber standards, as well as learn how to audit common security solutions.

CPE HOURS: 12 HOURS

WHO SHOULD ATTEND

This workshop is designed for IT auditors, heads of internal audit, internal audit managers, senior internal audit practitioners, risk managers and anyone who wants to build on their knowledge and increase their value to the organization by developing cyber and information security plans that address emerging risks.

TOPICS TO BE COVERED

- ❖ Overview of Cybersecurity
- ❖ Cyber Threat Landscape
- ❖ Regulatory Compliance
- ❖ Risk Assessment & Auditing Cybersecurity
- ❖ Incident Response & Recovery
- ❖ Security Monitoring & Reporting
